Anurag singh jadoun

Pune, India +91-8272896087 anuragjadoun024@gmail.com LinkedIn GitHub YouTube

Profile

Software Developer with hands-on experience in Java, Spring Boot, REST APIs, and full-stack application development. PG-DAC graduate with practical experience in backend development, OOP, SQL, database integration, and scalable REST-based applications. Working knowledge of Generative AI concepts, C, and ASP.NET, with a focus on building reliable production-ready software.

Education

Centre for Development of Advanced Computing (CDAC) **Aug 2025 – Feb 2026**
Post Graduate Diploma in Advanced Computing (PG-DAC) *Grade - A*

Dr. A.P.J Abdul Kalam Technical University **Aug 2021 – Aug 2025**
B.Tech in Computer Science and Engineering *Percentage - 81.4*

Technical Skills

- **Languages:** Java, C++, C, JavaScript, C#
- **Backend:** Spring Boot, Spring Security, Spring Data JPA, Hibernate, RESTful APIs, ASP.NET Core MVC
- **Generative AI:** Spring AI, Gemini API, LLMs, Vector Embeddings
- **Frontend:** React.js, HTML, CSS, Bootstrap, jQuery
- **Database & Tools:** MySQL, Git, GitHub, Postman, Docker, Kafka, Redis
- **Core Concepts:** OOP, Data Structures & Algorithms

Projects

Digital Campus Management System — *React.js, Spring Boot, MySQL* **GitHub**
- Built a full-stack academic management system using React.js, Spring Boot, and MySQL for managing students, faculty, courses, and academic activities.
- Enabled role-based authentication and authorization for Admin, Faculty, and Student users using JWT.
- Exposed RESTful APIs with Spring Data JPA and integrated MySQL for CRUD operations, data persistence, and secure document management.

BingeBuddy Application — *Spring Boot, Spring AI, Gemini API, Vector Embeddings* **GitHub | Live**
- Built an AI-powered movie recommendation application using Spring Boot, Spring AI, and Gemini API to generate personalized movie recommendations.
- Leveraged vector embeddings to represent movie information as numerical vectors and identify semantically similar movies for recommendation.
- Integrated Gemini API with Spring AI to enable Generative AI capabilities and natural-language interaction within the application.

NoCollege Application — *Spring Boot, MySQL, Docker, React, Microservices* **GitHub**
- Engineered a full-stack academic resource-sharing platform using React and Spring Boot for secure upload, access, and management of study materials.
- Architected a microservices-based backend with Spring Boot and RESTful APIs, reducing API response latency by 35% through optimized queries and modular service communication.
- Secured application workflows with JWT authentication, OTP-based email verification, a dedicated notification microservice, and Razorpay payment integration.
- Containerized and deployed application services using Docker with environment-based configurations across Render, Railway, and Vercel.

SummarizeAI — *Spring Boot, Spring AI, Gemini API, Generative AI* **GitHub | Live**
- Created a Generative AI application that transforms user-provided text into concise summaries using Spring Boot, Spring AI, and Gemini API.
- Connected the Gemini Large Language Model (LLM) through Spring AI to generate context-aware and concise text summaries.
- Exposed RESTful API endpoints for text processing and AI-generated responses through the Spring Boot backend.
